RABBIT CHASES DOG—IT'S NEWS

MASSEY GETS LONDON OFFICE

EARTHQUAKE SHAKES CANADA

As the editor says "when a dog bites a man, that's not news; but when a man bites a dog, that's excellent news." So the following is news:

Deputy Sheriff George Pym's five-pound terrier, of San Jose, Cal., has learned nothing of the elemental facts in a small dog's existence. It is never taught a jack rabbit.

Near Alameda, the dog spotted a large jack rabbit looting across the field. Barking fiercely, the small dog chased the rabbit several hundred yards. Suddenly the enraged animal turned and took after the dog, running her into a culvert. It took the combined efforts of Pym and his 15-year-old son to save the dog from being nibbled to death.

OTTAWA—Hon. Vincent Massey was Canadian high commissioner in London for a brief period in 1929. In London for a brief period in 1929, Massey has again been appointed to that post. Prime Minister King announced on Thursday last, Mr. Massey's appointment will date from November 8, the government having accepted the resignation of Hon. G. Howard Ferguson, present high commissioner, as effective on that date.

Meeting the wishes of the Canadian government which desires to have discussion held with the British administration on a number of important matters without delay, Mr. Massey has consented to leave for London toward the end of this week.

An earthquake shook Canada on Friday, with a rumbling shock from the head of the Great Lakes to the Bay of Fundy. Buildings were shaken, dishes knocked from tables and thousands of persons frightened so badly they rushed into the streets during the tremor that lasted from 15 seconds in some areas to a minute or more in others.

Damage was almost negligible in Canada, but a house caved in at Syracuse, N.Y. and street signs fell to the street in Plattsburgh, N.Y.

Two seismographic instruments at the Dominion Observatory in Ottawa were broken by the quake's severity. Telephone communication in Central Ottawa was disconnected for a time after the shocks, fell about 1.65 a.m.

"Let us" said the country supervisor, "put our heads together and make a concrete road."

A Boston composer says that music is a medicine. Well, maybe so, but some of it is a pretty stiff dose.

# The Carbon Chronicle

VOLUME 14, NUMBER 40

CARBON, ALBERTA, THURSDAY, NOVEMBER 7, 1935

\$2.50 A YEAR; 5c A COPY

## ALBERTA'S DEBT INCREASES \$4,248,047.10 IN PAST 5 MONTHS

EDMONTON—In the six months April 1 until September 30 the net funded and unfunded debt of Alberta was increased by \$4,248,047.10, according to the financial statement of the first half of the fiscal year, a period ended on September 30, released by Hon. Chas. Crockett, Provincial Treasurer.

Redemption of provincial savings certificates required \$1,457,756.35 according to the interest report. This is the regular quarterly report issued by the government as a result of the redemption passed a couple of years ago in the legislature. This statement has been issued more promptly than has been the custom in the past.

## LONDON, ONT. TO BUY COAL FROM ALBERTA

As an experiment, the welfare card will purchase a quantity of Alberta coal for retail purposes. It was decided last week. If it proves satisfactory, further purchases will be made.

## GOVERNMENT INCREASES RETAIL LIQUOR PRICES

With increases up to 25 cents on a 40 ounce bottle of Scotch, 20 cents on a smaller bottle of 20, 20 cents on Imported gin, 10 cents on Canadian gin, 10 cents on the more costly liquors and five cents on a dozen pints of beer, new prices at Alberta Vendor stores went into effect on November 1st.

In brief, the tax is averaging 25 cents on 40 ounce bottles of Scotch whiskey, 20 cents on 25 ounce bottles and 10 cents on 15 ounce bottles. The tax is approximately the same on brandies. Vines are increased in price from five to ten cents per bottle. No tax is listed on the small bottle of Canadian dry whiskey.

The new price list includes the notation in red: "Prices quoted in this list include an assessment for relief purposes."

The prices go into effect following an announcement by Premier Abernethy that he hoped to raise \$200,000 by this method.

A newly created pass received the glad tidings in a telegram: "Hazel gave birth to a little girl this morning; both doing well." On the message was a sticker reading: "When you want a boy call Western Union."

## AFTERMATH

"If Ye Break Faith... We Shall Not Sleep!"

Over the crimsoned field where poppies blow  
A grey mist hovers like a changing veil;  
And voices bring a cry from out the mist:  
"We sleep not, comrades, do ye see the faith?"

They gave their lives to make a better world,  
Safe for the old, the helpless, and the young—  
Safe for that wider brotherhood of men:  
The heroes—what are the victims of their war?"

What is this for whom we keep the quarrel?  
What for the blood in the market-places—  
What but the lid in the market-places—  
The symbol of a nation's selfishness!

Is this remembering, that did he say  
They who were with "them" false to our doors—  
Begging their humble stint of daily bread—  
The heroes—what are the victims of their war?"

That day by day they toll the war yards,  
While little children, after, and women;  
Our granaries overflow with golden grain!  
"What say you, comrades? Is the Torch held high?"

Far on Olympus, how the Gods must laugh!  
The larks still sing; the morning comes again  
We heard the publican's cheer; the chaft;  
The poppies flourish—but our rest is gone!"

Ledco, Alberta. G.E.R. RHAW

## MOTORISTS WILL FIGHT FURTHER GAS TAX JUMP

Any action by the new provincial government to raise the gasoline tax in this province will meet with the strong opposition of the Alberta Motor Association officials announced.

It is realized that when the government admits that the treasury is empty and it is hard to get the sum of there is a danger of a further levy on the motor car owners. When the Alberta tax was raised from six to seven cents a gallon this year, there were threats that the validity of the legislation might be challenged.

The first step in the first province to impose this tax, levying it in 1922 when the rate was two cents per gallon. That rate has been climbing ever since, but Alberta still is below Nova Scotia, New Brunswick and Prince Edward Island, each having an eight cent tax.

The severe burden the gasoline tax places on motorists at present is shown in the estimate that, on the average, motorists pay a cent more gasoline tax for every three miles they travel. Over the season the tax amounts to a fairly substantial sum, and there is the fairly stiff car license fee in addition.

The resentment which many motorists have against the gasoline tax could be moderated if the government could \$2,000,000 of the \$2,000,000 tax revenue for example and applied it to pay off a \$20,000,000 loan to be used entirely for a hard surfaced road program for this province. Spread over 20 years, the issue could be paid off by apportioning two-thirds of the revenue from the gas tax for that purpose.

## TRIALS AND TRIBULATIONS

He was the owner and publisher of a Canadian town newspaper, a man of many sterling qualities, his outstanding weakness being a violent temper. For weeks the gasoline engine that he had been acting testimentally, came another piece morning, and the engine coughed, spluttered and stopped. Red-faced, and talking to himself, while his assistants discreetly retired to the shelter of the cases, the proprietor suddenly set his jaw unusually, and his standing plant by the back door. He reappeared in a minute with an axe in his hand, and an all-conquering air in his eye. Giving a hearty "good" he smashed the engine into utter submission, carefully placed aside the axe, brushed his hands in a whole-hearted manner, went to the telephone, ordered an electric motor from the local dealer, and walked back to his case and commenced setting type without speaking a word.

## FARMERS' EXCHANGE PUTTING ON MONSTER HARVEST SALE

Mr. Pater arrived in Carbon on the first of the week and will conduct a monster fall sale for the Farmers' Exchange Department Store in Carbon. The entire stock is placed on sale, commencing on Saturday, November 9, and posters will be in the malls throughout the morning hours available.

## RETURNED MEN

A few more words of thanks would seem so small:  
I could not write them, speak them, think them,  
But tears will fall,  
And a surging pride akin to pain  
Will mark my heart when  
I see the valiant maimed, the mangled men,  
The memory eyes  
Of Returned Men.

While We Honor the Dead to Day  
Honor the Brave Living:  
The Returned Men.  
All of them gave and thousands of them  
Are still giving.

M. Josephine Turner.

## TO KEEP YOU GUESSING

Why is a dog's tail like the heart of a tree?—Because it is the farthest from the bark.

What is the smallest bridge in the world?—The bridge of your nose.

Why does time fly?—Because so many people are trying to kill it.

Which towel has the longest time?—U. because it is always in the midst of time.

Why is a retired carpenter like a lecturer?—Because he is an expounder.

How would you speak of a sailor?—As Mr. So. So. (Sow and Sew).

Why is a candy like a horse?—Because the more you lick it the faster it goes.

Who was the first profiteer?—The whale that swallowed Jonah; he grabbed all the profit in sight.

What most resembles the half of a cheese?—The other half.

What is it that turns without moving?—Milk when it sours.

Why is a river like an elbow?—Because it is always bending.

## CURLING STARTS IN ALBERTA

Word was received on Monday that curling had started in Drumheller over the week end and that ice was in good condition.

The Carstairs News reports that a "crew of crows" were busy getting things in place for flooding and have one sheet covered with snow. If the weather continues cold they expect to start springing tomorrow. This was on Thursday last.

## The Big, Big, Big

Stranger at Crossroads Store: Who is the close-mouthed fellow over there in the corner? He hasn't spoken a word for the last 15 minutes.

Village Legend: How? That's Pete Blackmore. He ain't close-mouthed—he's just waiting for the storekeeper to bring back the aptom.

After yesterday's wilderness have for some time elicited the concern of conservationists, but now science is hoisting a flag of discovery in behalf of some of the glaciers which had fair to disappear within a few decades. It appears, however, that the United States Geological Survey, for the first time in 29 years, Glacier National Park, Montana, may be minus its glaciers. Fourty Glacier National Park, Washington, also has suffered from heat prostration. At no time within the memory of living persons has the recession of the ice rivers in those areas been so rapid as during the long-protracted heat wave of 1934. Turning normal winter snowfall and frostiness are wont to replace to a large degree the melting snows of summer.

Third annual competition for the most beautiful autumn-tinted maple leaf is announced by the Canadian Travel Bureau at Ottawa in cooperation with the Canadian Pacific and Canadian National Railways. A total of \$100 goes to the person sending in the most beautiful leaf; a second prize of \$40 and a third of \$20. In addition a prize of \$25 for the leaf with most red, and for second largest it will be awarded.

"Steel Empire," the recently published work by John Murray Gibson, while really the story of a Canadian, has in it so much of other Canadian history that it will find a permanent place as one of the outstanding contributions to the records of the Dominion. Starting with the first Canadian arrival on the shores of the Great Lakes, Mr. Gibson traces the romantic growth of the Canadian Pacific and the Canadian National, with a wealth of incident and detail, the author's long association with the railway having been of the utmost value.

Possessing one of the finest collections in the world of colored pictures of scenes in the heart of the Canadian Rockies, the late, Mr. J. L. Leach, of Banff, recently exhibited a number of his pictures at the Vancouver Hotel. The pictures, which were of the mountains, valleys, lakes and birds, and flowers of the Rockies.

Evangeline Booth, 69-year-old commander-in-chief of the Salvation Army, was elected to the "Army" to the Men and Women's Canadian Club at the Royal York Hotel, Toronto, last night. "I was born in the Salvation Army," she said, "but I have never become a common thing to me. It has always been a miracle." A capacity audience gave her an ovation.

Keen outdoor man, enthusiastic hunter and past president of the Trail Riders of the Canadian Rockies and a leading authority in the ranks of the "trail riders," J. M. Warble, chief examiner, National Parks of Canada, has won well-deserved promotion to the post of deputy minister of the Department of the Interior, Ottawa.

Premier Dymally, of New Brunswick, was the chief speaker here in the close-mouthed fellow over there in the corner? He hasn't spoken a word for the last 15 minutes. He's just waiting for the storekeeper to bring back the aptom.

## BUILDERS' HARDWARE STORES LTD.

AARON KLASSEN, Manager PHONE 3, CARBON, ALTA.

## PLA MERGER OF DEPARTMENTS IN FEDERAL CABINET

Ottawa.—Assembly of a Dominion-provincial conference at an early date, reduction in the size of the Dominion cabinet by merger of departments and adoption of the British system of appointing parliamentary under-secretaries to assist cabinet ministers were three announcements made by Prime Minister Mackenzie King.

As soon as the new cabinet had been sworn in Mr. King issued a statement explaining his views on these matters.

Prime Minister King intimated that after the government was sworn in cabinet council immediately discussed preliminary plans with respect to calling of the Dominion-provincial conference, constitution of the national unemployment commission and matters relating to trade with Great Britain, United States and Japan.

Finance Minister Dunning will have, in addition to provincial finance, the question of heavy refunding operations to deal with.

Many administrative changes will result from the merger of six departments which involve the disappearance of three portfolios. Transportation will be gathered into one jurisdiction with the marine, fisheries and marine departments, the interior department will be merged with immigration and colonization, and the department of solicitor general completely with the duties of that minister taken over by the minister of justice.

All these changes will require legislative action and numerous staff and office adjustments. Considerable reorganization will be required also to bring about proposed adoption of the English system of parliamentary secretaries to the minister of the departments. Members of the House of Commons will be chosen in the same manner as ministers are selected, to act as assistants to the ministers of certain departments. They will be on full time with salaries, while not attending meetings of the government will be empowered to speak for their departments in the House of Commons, thus relieving the ministers of a burden which in some instances, has proven heavy.

## Search For Meteor

Excavation Work Carried On In Manitoba District

Porter, Man.—A crew of men worked to excavate what is believed to be a meteorite that struck the skies during a severe electrical storm Oct. 15.

Residents of this district, 35 miles west of Winnipeg, declared a "roaring noise" was heard during the night. The next day a hole 12 inches in diameter was found within 40 feet of the home of Cornelius Giebrecht and within 70 feet of the general store of A. B. Manthey.

The noise was first believed to have been lightning striking the ground. Later the belief was expressed it might have been a meteor. No indication of the meteor has yet been uncovered but excavation work is under way at the scene.

Excavation work is under direction of Prof. V. W. Jackson, of the University of Manitoba.

## Canada At League

Seat Given On Governing Body Of International Labor Office

Geneva.—Canada was unanimously elected to the governing body of the International labor office in succession to Germany. In acknowledging the election, Dr. Walter Biddell, the Dominion's advisory officer here, said it came at a time when the interest of the Canadian people in social and industrial problems was greater than ever before.

The government body selected Dr. Biddell as chairman.

The international labor office is closely connected with the League of Nations, but has a parallel organization of its own here, also set up by the peace treaty of 1919. The governing body consists of 12 representatives of member governments. It organizes international conferences with view to agreement on enforcing higher standing of labor.

## Will Attend Naval Conference

Rome.—Informed quarters here believed Italy's participation in the naval conference planned for London in December was virtually assured. Although no official statement has been issued, it is widely expected that Italy is unlikely to refuse to attend.

## Heavy Taxation

Hoars Claims Nearly Ninety Per Cent. Of Income Goes To State  
Hollywood, Calif.—William Hoars, in a letter to the Hollywood editors of Variety, declared that high California taxes have compelled him to close his place in this state "and live almost entirely in New York."

Pouncing upon the recently enacted California income tax, the publisher expressed fear a large number of people "with considerable incomes" are planning to reside elsewhere, to forego an opportunity for development in states with easier taxes.

"The California income tax goes to 15 per cent," the letter said. "Add to this the federal income taxes and the New York taxes, plus many other taxes, and I find that over 80 per cent of my income will go in taxes—in fact it may be nearer 90 per cent."

## Important Measures

Alberta Premier To Take Steps To Relieve Hardships In Province

Edmonton.—Forecasting important measures to relieve farm debt burdens and hardship in Alberta, Premier Herbert was heard to say one need think that all he had to do was to sit back and wait for basic dividends to come.

At an afternoon luncheon tendered the new Social Credit government by the city of Edmonton, Premier Albert said: "You will shortly hear of a way that farmers can get out from under their heavy mortgage load."

The premier pledged for sympathy and co-operation between the government and the farmer, but not a single step would be taken by the government without the best expert advice.

## May Repudiate Pacts

Sir Herbert Samuel Refers To The Ottawa Agreements

London.—Sir Herbert Samuel, leader of the Liberal opposition, in the House of Commons, interpreted the Ottawa agreement of 1922 as not a quarrel between Great Britain and Italy. "There would never be collective agreement for such action," he declared.

Sir Samuel's speech was followed by vigorous opposition attacks upon foreign policy, led by Major Clement Richard Attlee, Labor, and Sir Herbert Samuel, Liberal, which furnished a keynote for the election, expected to be fought out largely on international issues.

Sir Samuel urged that the short breathing spell before the application of economic sanctions against Mussolini's government be used in another attempt for peaceful settlement of the Italo-Ethiopian conflict.

The foreign secretary, addressing commons on its resumption, asked if an seventh hour chance cannot be used to make unnecessary further progress along "the unattractive road of economic action against a fellow league member, an old friend and a former ally."

Arctic Route  
Moscow.—Steam navigation from Europe to the far east by way of the Arctic ocean has been put on a practical basis by the Soviet government. The Soviet northern sea route department, reported to Joseph Stalin.

Twenty persons were arrested at Krasnodar for plotting to overthrow the Soviet government. The Khlobov tribunal of fostering plans to sabotage the Soviet Union's already seriously handicapped communications system.

## May Be Candidate

Sir Malcolm Campbell, Racing Driver, May Enter Election Contest

London.—Sir Malcolm Campbell, the racing driver, notified the Department of Conservative Association he is willing to stand as a candidate for the division at the general election, in place of Denis Hanley, who is resigning.

Arthur Roy Duroso, son of Sir Arthur Duroso has been named to stand for Carraroon against David Lloyd George. Mr. Duroso is barely 23 years of age, a graduate of Oxford. He will be admitted to the bar in January.

## Succctions Approved

Durban, Union of South Africa.—Three resolutions designed to hinder Italy's campaign in Ethiopia were passed at a meeting of 800 persons in the city hall. The resolutions called upon the government to prohibit the export of meat to the Italian army, to cancel the Italian shipping subsidy and to put in force any further economic sanctions within their power.

## A Careful Driver

Edmonton.—Presentation of a watch to Alex Williamson, truck driver, in recognition of his driving 273,000 miles on the Edmonton-Calgary highway without an accident, was made by directors of the Alberta Motor Association.

## MILITARY ACTION IS NOT PROPOSED AGAINST ITALY

London.—Sir Samuel Hoare, foreign secretary, issued an appeal for an honorable settlement of the Italo-Ethiopian controversy and said Great Britain had no intention of acting alone to halt the campaign in East Africa.

Sir Samuel outlined in detail the progress of the quarrel between the two countries in opening debate in the House of Commons on the international situation.

Sanctions to be taken against Italy were economic and not military, he said. "We have never even proposed an instrument of war."

Certain countries failed to realize, said Sir Samuel, that "the league as a bridge between Great Britain and Europe and that if this bridge is gravely weakened or broken, cooperation between us and the continent becomes difficult and dangerous."

The foreign secretary emphasized the sincerity of our hope and faith in the new order of international relations. They failed to understand our belief in the league as an instrument, not only for stopping war, but also as an instrument for removing its causes.

The foreign secretary emphasized that Britain's interest in collective security and world peace was the motive for her firm stand at Geneva.

"No thought of imperial interest save a natural concern, which a world-famous empire must feel for preservation of world-wide peace, has entered into our minds."

Towards the end of his speech Sir Samuel said: "The league, let us remember, is a great instrument of peace. Let critics remember this fact when they say that we ought to close the Suez canal and cut Italian communications."

Such action, taken alone, would destroy Britain's contention that "the league is not a quarrel between Great Britain and Italy." There would never be collective agreement for such action, he declared.

Sir Samuel's speech was followed by vigorous opposition attacks upon foreign policy, led by Major Clement Richard Attlee, Labor, and Sir Herbert Samuel, Liberal, which furnished a keynote for the election, expected to be fought out largely on international issues.

Sir Samuel urged that the short breathing spell before the application of economic sanctions against Mussolini's government be used in another attempt for peaceful settlement of the Italo-Ethiopian conflict.

The foreign secretary, addressing commons on its resumption, asked if an seventh hour chance cannot be used to make unnecessary further progress along "the unattractive road of economic action against a fellow league member, an old friend and a former ally."

Arctic Route  
Moscow.—Steam navigation from Europe to the far east by way of the Arctic ocean has been put on a practical basis by the Soviet government. The Soviet northern sea route department, reported to Joseph Stalin.

## ARTHUR HENDERSON

Noted British labor leader and president of the world disarmament conference, who died Sunday, Oct. 20. The 72-year-old British statesman won the Nobel peace prize in 1934.

## Waterways Treaty

St. Lawrence Project Awaits Ratification From Washington

Ottawa.—Defeat of the Bennett administration and inauguration of a ministry headed by Liberal Leader King will make no difference in the status of the St. Lawrence waterways treaty with Washington, it was said here.

The treaty will remain pigeon-holed until money by the American senate by a two-third vote. Then the new government would be forced to consider it and have it either passed by parliament or defeated.

Although Premier-elect King has never made public his views on the treaty, two of his provincial lieutenants, Premier Hepburn of Ontario and Premier Taschereau of Quebec, have opposed it, the former most strenuously.

## Cost Of War

Italy Is Paying Heavily For Operations In Ethiopia

Geneva.—Statistics of the Bank of International Settlements sent to the League of Nations indicated the cost to Italy of the Ethiopian war.

The figures showed during the first half of October the bank of Italy lost 206,000,000 lira in gold. Experts estimated if this figure is taken as an average, about 453,000,000 lira, or over 10 per cent, of the Italian gold reserve at the end of September, has been withdrawn in the past three weeks.

Go To The Front  
Rome.—Dr. Filippo Tommaso Marinetti, poet and author and Italy's "Father of Futurism," sailed for East Africa to join troops in East Africa.

News of his departure, his rallying call to arms in military circles, because although Marinetti is acknowledged to be a good soldier—he holds two Great War medals for valor—he is more famous as a bizarre artist.

## Boy Actor

Freddy Bartholomew Becomes Legal Ward Of Aunt

Los Angeles.—Freddy Bartholomew, 11-year-old screen actor, became the legal ward of an aunt, Miss Myllicent May Bartholomew, and in her capacity as court hearing gave his opinion on what happens to boys who tell lies.

Attorney Felix Cunningham, representing Miss Bartholomew, asked the child actor if he understood what it meant to swear to tell the truth and then what happens to boys who do not.

"They probably go to hell," said Freddy candidly.

The boy's parents, Mr. and Mrs. Cecil Llewellyn, now in England where Freddy was born, opposed the guardianship petition.

Miss Bartholomew testified she had exclusive care and custody of Freddy for eight years and had carefully explained the reason for the trip to Hollywood to his parents. She said the young actor had a contract to work 40 weeks each year in pictures at \$1,000 a week.

## PAYS A TRIBUTE TO THE GOODWILL OF CANADIANS

London.—The Earl of Desborough, speaking at a dinner tendered him by the Canadian club, urged that more people travel between Great Britain and Canada and paid warm tribute to Prime Minister R. B. Bennett and Prime Minister-elect Mackenzie King.

The earl, who has just completed a term as governor-general of Canada, recalled with approval the suggestions made by Premier Baldwin at the Ottawa imperial conference, 1932 for exchange of civil servants between Whitehall and Ottawa.

The former governor-general paid tribute to the goodwill shown him by Canadians. He owed a great debt to the assistance of Lady Desborough "if any of the many kind things said about us in Canada are true, the credit is due entirely to my wife," he said.

Mr. Bennett, he declared, was respected by people of all political parties in Canada. The earl described Mr. Bennett as a prodigious worker, of phenomenal memory and great ability, with a particular knowledge of financial and legal questions.

"During my time in Canada—difficult of unexampled depression—difficult problems presented themselves continuously, some of them of great urgency. However burdened or exhausted by the care of office, I always found Mr. Bennett ready to stand and loyal friend for whom no pains were too great to help his friends.

In His Majesty's government he was more devoted servant and in the cause of empire no more convinced adherent."

The former governor-general recalled that when he arrived in Canada, "the first thing that Mr. Mackenzie King said to me was that if there was anything the opposition could do to assist me he was entirely at my disposal. In the year that followed he was as good and better than his word. Our personal relations at all times were of the most delightful character."

But, G. Howard Ferguson, Canadian high commissioner in London, was given an ovation by the gathering. He paid tribute to the great public services of the Earl of Desborough in Canada.

"He lived up to the highest ideals of British public service and exercised an influence staying in and helpful in guiding Canada through one of the most depressing periods in history."

He also paid tribute to Lady Desborough and said "the crowning achievement of the Desboroughs was the production of a young Canadian." (A son was born to "Their Excellencies" at Montreal in 1931.)

J. H. Thomas, Dominion secretary, likewise commended the earl for his remarkable public service and devotion.

Referring to the ovation paid Mr. Ferguson, he said: "We are not ungrateful of the changes which must necessarily occur, but I would be wanting in my duty if I did not say publicly how every Canadian and every Britisher is proud of the great service rendered by his high commissioner to his country."

Mr. Ferguson is expected shortly to place his resignation in the hands of the Canadian government, following the defeat of the Conservative party in the general election.

## CALL A NAVAL CONFERENCE TO MEET DECEMBER 2

London.—Great Britain formally invited the United States, Japan, France and Italy to a naval conference at London.

The government set the date for December 2, and followed up the invitations with an announcement in common by Sir Bolton Byers-McConnell, first lord of the admiralty, that the purpose of the conference would be to obtain an agreement replacing treaties expiring in 1936.

These are the Washington and London naval limitation pacts.

In Paris, officials said France would accept the invitation. Naval minister Francois Piétri, was expected would join the British in asking qualitative instead of global (tonnage) restriction of fleets, which Japan has sought.

In Washington the state department, following the invitation, said it had accepted the invitation also.

In Tokyo, vernacular newspapers quoted anonymous naval officials as saying the attitude of the United States on parity promises little hope of success for the conference, although a foreign office spokesman would be difficult "as long as the government" hope for tangible results.

The government expected immediate acceptance of the invitation. Naval minister Francois Piétri, was expected would join the British in asking qualitative instead of global (tonnage) restriction of fleets, which Japan has sought.

## Strides Made By Medical Science

Dr. Mayo Predicts Cure For Insanity Will Be Developed

Strides made by medical science in treating thyroid deficiency and performing guttie operations were explained to the assembly of the Interstate Postgraduate Medical Association of North America by Dr. Charles H. Mayo, of Rochester, Minn., retiring president of the organization.

Dr. Mayo drew a comparison of the old method of treating gutties merely by the external application of iodine to prevent highly-developed surgical methods. He declared, "thyroid operations are made with a minimum of danger because of the discovery of treatment of the gland to remedy the deficiency and build up the patient."

Dr. Mayo predicted within five years a cure for insanity would be developed. He told the physicians he expected to see insane patients restored by an injection which would act on the brain in a manner similar to the action of the cure for thyroid deficiency.

"This far," said Dr. Mayo, "we have not come a very long way from the medieval treatment of the insane, but the future, I am sure, holds promise of another kind."

"I am sure that we now have a drug which will change the blood circulation of the brain and will prove especially effective in the case of young persons suffering from dementia's process."

"I have myself seen patients who had been confined to a hospital for periods of more than seven years, after infection with this substance. Almost instantly, their eyes became bright, their mental faculties returned, they became sane and their surroundings; they left the hospital."

"But within three weeks," Dr. Mayo said, "the effects of the drug had disappeared and they were back again at the institution."

The Rochester physician said he believed the cure received by his patients made permanent. He refused to name the drug, explaining the experimental still is in progress, and that it has not yet reached a point where a definite report can be made.

### Sanitary Crusade

Mahatma Gandhi Overcomes Prejudice In India

In his sanitary crusade which Mahatma Gandhi abandoned politics to organize, he is meeting with encouraging success. He has turned his workers into an army of scavengers and so dealt a deadly blow to caste and pride. Men and women who would not have allowed scavengers to pass within 20 yards of them are actually going about with brooms, brushes, buckets and disinfectants. The villagers are anxious to find persons of education and refinement from comfortable homes sweeping roads, collecting the refuse and doing all sorts of mental work in the movement to lift up the Indian country-tyes.

### Stamps Of Abyssinia

Various Animals Used To Identify The Denominations

Abyssinia first issued stamps, 1914, the design being a portrait of Emperor Menelik II, and the Lion of Judah. King Solomon's throne was depicted on the next series of stamps, together with a portrait of Menelik in a native costume.

There followed what is called the wild animal set. On the lowest value was shown an antelope, a giraffe was the design of the second value, rhinoceros, elephant, crocodile, water buffalo, and lions were depicted on other values.

On the issue now on sale are depicted portraits of the various rulers of Ethiopia, and the statue of Menelik II, mounted on a rearing horse.

### Two Tail Lights

Persons walking at night on the highway through the hills between Adelaide, Australia, and Gowa, some distance from the city, are being supplied with red tail-lights which they hold behind them as a signal to approaching cars. Cautions have been reduced to a minimum.

### Grazed Wheat Grass Seed

The past season has been favorable for wheat grass crops in the prairie provinces. It is expected that 100,000 pounds of crested wheat grass will be available in Alberta which will go a long way towards supplying need for farmers and ranchers who are renewing their pastures.

MacDougall—Did you say anything to cheer up Randy McPherson after his operation?

MacTavish—Yes. I told him he might not live to pay for it.

## BRITISH STEAMERS HAVE HARD TIME DURING HURRICANE

Plowing her way through mountainous seas the "Cala de Argente", above, Channel steamer plying between Calais and Dover, is shown as she passed the entrance to Dover Harbour, but unable to get inside because of the terrible wind and storm. She travelled almost to Folkestone before she could turn and safely come back to Dover. This gale was one of the worst experienced in years and several ships foundered in the Channel.

### Rhubarb For Winter

How To Grow The Plant During The Winter Season

Fresh, crisp, pink rhubarb can be had during the winter months if the plans are made now to provide roots for forcing. The root system of a plant is a storehouse in which the necessary food has been stored and when given the required check and rest period, will produce an abundance of leaf stalks.

First arrange for crowns that have been in a plantation for at least two years or until they are well developed. Crowns that are over four years in a plantation do not force as well as those of the younger plants. In late October or early November, just before the ground freezes up, the roots should be dug, allowing a good ball of earth to adhere. Leave those on the surface of the ground without protection, where small numbers of roots are to be used.

Sub-zero freezing, however, is not recommended. Four or six crowns of fair size will, as a rule, produce enough rhubarb for a family of three or four.

The crowns or roots being given the required period of dormancy are then brought into a dark cellar, where the temperature can be maintained at 50 degrees F., placed on the cellar floor and covered with soil, sand or cinders. The soil, sand or cinders hold the moisture around the roots. Another very good way is to place one large crown in a bushel hamper or box, packing soil around the roots. Where several roots or crowns are to be used they can each be placed in a hamper or box. This method is very convenient for handling, where small numbers of roots are to be forced. In commercial forcing, the roots are placed closely together as possible, on the forcing house benches, and soil, sand or cinders placed around them. Water is applied when required.

To give continuity of harvest the roots or crowns should be brought into the forcing cellar at intervals of two weeks apart. It usually requires around three weeks to a month for the crop to be ready for pulling. If the roots are to be used for planting out again in the following spring, it is unwise to remove more than five pullings. After the fifth pulling the crowns should be put outside and allowed to freeze up again.

For forcing purposes, it is unwise to use poor quality varieties, although some growers use seedlings. It is unwise to use an even and uniform product, Ruby MacDonut or Victoria, as they are found quite satisfactory, but where large stalked rhubarb is desired the variety will be found very useful.

### Deadly Jazz

Elephant In South Africa Succumbs To Synopsated Noise

Jazz may be adopted as the death music for elephants in the Bechuanaland following the execution of a young elephant by a farmer near Nairobi recently. The man was surprised to discover at milking time, a large bull elephant grazing with his herd of pedigree cows. He organized a gang of boys with milk pails, would make a noise and with this accompaniment jazz band went after the intruder. The elephant fled precipitately. The following morning the huge beast was found dead at the boundary of the farm. Anti-jazz musicians declare the synopsated noise caused its death.

Horses may be hanged from London streets.

### Shoe Industry Busy

Production Of Leather Footwear In Canada Is High

In these days when much is being said about lost trade and unemployment it is interesting to learn from figures supplied by the trade itself that the production of leather footwear in Canada in the first half of the present year is the largest for any similar period in the history of the Canadian industry. The closest approach to the current figure was made in 1928, which was a year of great prosperity for the shoe and footwear industry supplies most of the home market, but there are moderate imports, mainly from the United States and the United Kingdom. The Canadian industry also exports boots and shoes in limited quantities, the largest market being Great Britain. In the twelvemonth ended with June, both imports and exports of boots and shoes showed increase in value.—St. Thomas Times-Journal.

### Punishment Is Severe

In the United States to-day a house or other structure is willingly set on fire for insurance, excitement or revenge—on an average of once every 105 minutes, despite the fact that arson fires are usually easy to detect and the punishment is severe. In six state conviction calls for the death penalty and, in four others, it results in either life imprisonment or a 20-year sentence.

The ancient Circus Maximus in Rome, Italy, may be restored and again become the greatest stadium in Europe, with seats for 500,000.

### Man Sacrifices Sight

Medical Science Gains Valuable Information On Eye Disease

A white man's sacrifice may be the sight of Indians.

The white man was Clarence Brown, 50-year-old Iowan from Iowa City, who risked and lost the sight of one good eye that medical science might gain valuable new information of trachoma, a dangerous disease.

Brown, pronounced by physicians incurably ill from a malignant disease, entered the U.S. Indian hospital at Fort Apache, Ariz., last spring and permitted physicians to implant the virus of trachoma in his remaining eye.

The American journal of ophthalmology reports the experiments. Six weeks after the virus was implanted in Brown's eye he became totally blind, proving, the report said, that trachoma is a communicable disease. The experiment, proved also, the virus is so small it can pass through a filter which would halt ordinary germs.

### Still Carries Passengers

The packet schooner Oroica, said to be the only sailing vessel on the Atlantic still carrying passengers, cleared from New Bedford, Mass., recently for the Cape Verde Islands, 3,000 miles and at least a month away. On board were 25 persons and a small cow. The cow will be taken only long enough to fatten a bit for the meals she will provide later on the voyage.

A New York dog cleaner claims to be able to treat rugs so they look like antiques. We had a laundress who could do that with a hairbrush.

## Growing Egyptian Wheat

Using Seed Supposed To Have Come From An Eastern Tomb

A little farm hidden unobtrusively away south of Carmarthen, Alberta, is attracting attention from farmers because of an unusual and unique experiment which is slowly reaping success. This experiment is the growing of Egyptian wheat. For 13 years experiments have been made with the seed, supposed to have been grown from wheat taken from the tomb of an Egyptian king. It is a hard-headed wheat that grows rankly, its main interest being in its feed qualities.

William Peacock, a farmer there, made the first tests and at last received some recognition for his work before his death. Planting the wheat at first in a small garden plot, he harvested it by hand. For three years he carried on this process until he had collected enough seed to start extensive sowing. Finally his labor bore fruit and he sold some of his seed at \$1.50 a bushel and used the remainder for fattening hogs.

Peacock, however, before his death of having the wheat recognized as of real value came true. But the encroachment of the estate are continuing his work. Egyptian wheat is rapidly improving. The kernels are becoming harder, and each yield became heavier.

Last year a carload was harvested and forwarded to the elevator. It graded No. 2 C.W. White Spring and sold to millers for mixing purposes.

## Westerners Good Sailors

Youths Are As Efficient As Those From Either Coast

It is not unusual in the prairie states to meet the sons of sailors and they make very fine sailors themselves, any who have lived their lives in coast cities.

This was the comment of Commodore Harold H. Grant, Ottawa, in charge of naval reserves, Regina, to inspect the Regina high school company of the R.C.N.V.R. under command of A. C. Milnes.

The naval reserve was the counterpart of the non-permanent militia, insofar as the navy was concerned, Commander Grant said. The object was to train men who are keen on the sea in the discipline, the routine and various branches of a sailor's work.

Many now in the R.C.N.V.R. had come up from the Sea Scouts and in his experience, he found that the men in the reserve from inland cities made every bit as good sailors as those who had lived in seaport towns all their lives.

## Bound Man Uses Phone

Knocked Down And Tied Up, Uses Tongue To Dial

Dial phone operation with the tongue is the rare occurrence reported from Cleveland when the president of a brewing company had a difficult time motoring police and been held up. He was bound hand and foot by two men who took \$500 from his office safe, wriggled to a telephone, knocked the receiver off the hook and began to dial with his tongue. First he dialed "0" to get operator. "Tell police there's a hold-up here," said Crutinin. "Call the police department," the operator replied. "I can't," said the president. "I'm tied up." The operator then agreed to get police on the wire but she put the police on another line which Crutinin could not reach. So he started to dial again with his tongue. That time he got "long distance." He was able to make the long distance operator understand his plight, and proper connections to the police department were completed.

## Ex-Soldiers Turn Gardeners

Toil Underground To Supply English Markets With Delicacies

More than 1,000 pounds of mushrooms have been sent to market every day in the last 12 months by 37 ex-soldiers who grow the fungus underground in an abandoned stone quarry at Bradford-on-Avon, England. Every one of the farms is 48 acres is 90 feet below the ground, with meadows and grazing cattle overhead. On every side of a network of caves mushrooms grow in beds set in rows having a total length of 100 miles. Electric fans help to circulate the air. Although it is completely dark in the caves, a full moon causes the mushrooms to spring up much faster, the growers declare. The ex-soldiers' farms occupy all the caves in the district and the men are searching for more.

Construction of London's television station has been started.

## New Teaching Methods

Little Tools Are Learning To Use The Typewriter

Reading, "filing" and "vitalistic," those "three R's" sentimentally attached to school days, are now undergoing an alphabetical change. At least this is true out in the Berkeley school system, where typewriting has now become established in the curriculum for pupils from the second through the sixth grades. It is maintained that the use of the typewriter develops self-confidence in the little tots. It is a good medium for teaching punctuation and composition. It spurs an interest in spelling and reading. The little folks are allowed to operate the machines by the "bunt and peck" method, and older ones are taught the touch system.

The typewriter, like the automobile, has come to stay. Obviously the child might as well learn the use of an early age, gaining the mastery of one more tool.

But will it advance in the schools also mark the end of those hours painstakingly devoted to practice writing, to pages of ovals and oblique penmanship? The achievement of a clear, legible "hand." The Spencerian penmanship which embellished school days of a century ago with birds and flowers and scrolls is fast disappearing, going the way of the rebound state which teacher lay to rule for newcomers of a crisp firm morning beside the school-room stove, a task which even to-day can enable him to say that the epine as memory recalls that several of them on slate, not quite like any other round in the world.—Detroit Free Press

## High Blood Pressure

Now Said To Be Yielding To Surgical Operations

High blood pressure, one of the malaises attributed to the increased tempo of modern life, apparently is yielding to the surgeon's scalpel.

Speaking before one of the closing sessions of the annual meeting of the Interstate Post-graduate Medical Association, Dr. George Crile said that in 82 of his patients for the relief of malignant hypertension, or high blood pressure, had obtained remarkably favorable results.

The noted Cleveland surgeon pointed out, however, his work in this field had not been carried on long enough to enable him to say that the cures effected surgically were permanent. Dr. Crile said the fulminating sub-stance which causes malignant hypertension is manufactured in the sympathetic nerve system leading to the adrenal glands rather than in the glands themselves.

His technique in treating such cases surgically consists in clipping some of the sympathetic nerves supplying the glands and thus preventing them from sending the activating substance into the blood stream.

## Unexpected Journey

London Woman Travels To Glasgow On Fast Express

A London woman is believed to have made the most economical long-distance railway trip ever recorded. She set out on a journey of 80 miles, from London to Glasgow and back, at a cost of one penny. But it was against her will. At Euston station the woman bought a penny platform ticket in order to see a friend off on the Royal Scot express. She sat in the train with her friend waiting for the departure whistle. Apparently so engrossed in conversation was she that she did not know the train was starting until she suddenly realized that it was moving out of the station. Officials on the platform saw her rush to the window, and then look despairingly as the train gathered speed out of the station. But it was too late. The Royal Scot does not stop between London and Glasgow, 401 1/2 miles apart.

"Have you a good biography," said the minister at the bookstore.

"Yes, indeed," replied the man.

"Have you read 'The Wealthy Preacher'?"

"Perhaps you misunderstood me," insisted the minister. "I never read fiction."

Since 1929 the death rate for country babies has been higher than the death rate for city babies in the United States.

"Our great-grandparents would be amazed to see a car start simply by pressing a button," we read. So would lots of motorists.

Radio waves have approximately the same speed as light—186,371 miles a second.

## ACTUAL WAR PHOTOS FROM THE FRONT

As one of the few Ethiopian planes scouted the heavens for enemy planes, the Ethiopian military unit marched for the battlefield under a cover of dusk, weapons and munitions borne by pack mules. Below is a photo taken by the southern front showing an anti-aircraft gun crew scanning the skies to the Italian Somali-hand frontier for enemy machines.

Will the coming winter be colder or will it be warmer than the average of winters?

Will our coming winter be cold? In accordance with popular tradition it should follow a summer that has been rather warm. It may be cold—and it may not be. The five winters preceding that of 1933-34 was a warm one, but the long-term degree above normal temperature last winter was cold—nearly five degrees below the average of twenty years. To anticipate a cold winter would not be unreasonable, but a positive forecast would not be reasonable. There are too many factors of cloud cover of the kind that should dissipate into the air, and there is nothing to show that the earth is now radiating more heat than it is receiving. When March 22, 1934 comes to us the weather sharpens and their forecasts on goose-fall callosities will shoot "I told you so."

## WORLD HAPPENINGS BRIEFLY TOLD

Anna Il'yichina Yelizarova-Ulyanova, sister and close collaborator of Nikolai Lenin, died at Moscow at the age of 71.

Joseph Charlebois, artist and cartoonist, well known for his work in La Presse, Montreal, died in hospital here in that city recently.

Regular fall upwings of agricultural exports was reported by the commerce department to have lifted total United States exports 10 per cent. between September and August.

A striking longshoreman was shot to death at Port Arthur and two non-union dock workers were missing after non-union workers and a group of men engaged in hand-to-hand fighting.

The council of the international labor bureau of the League of Nations may designate Canada to occupy the seat in the assembly vacant by the withdrawal of Germany from the league, it was reported.

Of the 10,579,818 bushels of wheat imported by Canada in the first four months of 1935, Australia supplied 7,531,536 bushels. Argentina supplied most of the remainder while imports from United States and Canada were negligible.

All premises used as grasshopper poison mixing stations were condemned by the Manitoba government as unsuitable for living quarters for any person. The action was taken as a result of 25 roadworkers housed in a mixing station, being stricken with poison recently.

Purchasers of new cars in November and December this year will not be required to buy a part-time 1935 Ontario automobile license. It has been announced. Instead, these purchasers can buy their 1935 plates after Nov. 1 and these licenses will carry them to the end of December, 1935.

### Canton Takes Action

**Would Bar Small Merchants From Importing Old Newspapers**

The practice of small merchants in China, who wrap purchases in old American newspapers, may be halted by a measure put before the Canton Government to curtail such importations, the Department of Commerce reports.

The extent of the practice is taking by the fact that the city of Canton alone imported over \$1,000,000 worth of such old newspapers in 1934.

Chinese paper manufacturers started last year in stepping the merchants from so wrapping fresh foodstuffs, the Commerce Department said, and it is now planned to prohibit the importation of old newspapers.

South Africa's 1935 maize crop is estimated at 17,911,000 bags.

Killed In Automobile Accident

An automobile crash in Illinois ended the career of Sidney Smith, cartoonist-philosopher, who made "Oh Min" and "Soup-O" household phrases in many lands.

The veteran creator of "The Gumps," "Old Doc Yak" and "Ching Chow" who dropped pearls of wisdom and humor from his lips each day, was dead when they removed him from the wreckage of his car.

Smith, who was 58, ranked with Claire Briggs as probably the greatest portrayer of family life through the medium of cartoons. The daily doings of Andy and Min Gump, Little Chester and the fabulously wealthy Uncle Tim, their joys and their sorrows, have been a comic page feature for years.

More recently Smith introduced "Ching Chow," a little Oriental of few words and much wisdom. This last cartoon was made to tell readers such things as "The slave has but one master—the ambition to be free as there are people likely to be useful to him."

Smith's noted career started when he was but 18, making him one of the real oldsters of the game. The ranks of the veterans are thin, "Gus" Herriman, astute drawer of "Krazy Kat" and Bud Fisher, creator of "Mutt and Jeff," remaining as probably the two best known of the old hands.

Among the intimate little events Smith got out of his work was the license number 348. Long ago it appeared on Yale's auto. Then he transferred it to Andy Gump's half-pint buggy. Only Smith's intimates knew that it was the cartoonist's own motor permit number and was issued to him for many years.

Smith's attorney, R. Williams, disclosed that a few hours before the fatal journey the cartoonist had renegotiated his contract with the Chicago-Tribune-New York News Service. He said it stipulated the payment of \$750,000 for a five-year period.

The native of Bloomington, Ill., Smith had been a staff member of the Chicago Tribune since 1911. He began his career as a cartoonist on the Bloomington Eye in 1895.

### New Gold Discovery

**Several Groups Of Claims Staked In Ontario Near Manitoba Boundary**

A new gold discovery in the north-east corner of Ontario, where several groups of claims have already been staked was announced by Hon. Paul Leduc, Ontario minister of mines, who said the new area "appears a favorable one for prospecting."

David Foster, prospector for a Winnipeg group, was credited with the discovery. The area, it which quartz exposures were said to exist in three places over one 300-foot stretch, is 40 miles east of the Manitoba boundary and more than 200 miles north of the Red Lake discoveries. It surrounds the Sackville river.

### On Roof Of World

**Successful Trek Climbing Is Possible At High Altitudes**

Potatoes and other vegetables will grow at an altitude of over 7,500 feet in the Pamirs, "the Roof of the World," according to Professor M. Baranov, who recently conducted experiments for the Soviet Government. He declares that truck gardening is possible in the lofty mountains. The potatoes were grown from seeds, and tomato, cabbage, pepper and egg plant seeds are successfully taking root.

### Huge Sum In Tips

**Chimney Sweeps In Yugoslavia Won Fair Good Money**

Last year the 27 municipal chimney sweeps of Zagreb, Yugoslavia, earned between them, apart from tips \$130,000—almost \$50,000. This is far more than many bank managers can earn here. Sweeps in Zagreb are paid a monthly sum whether the chimneys need sweeping or not. They are then responsible for the cleanliness of all chimneys and for any fire due to chimneys not being properly cleaned.

### New Surgical Discovery

**Disintegrating Plaster Produced By British And Returned Soldier**

Product of a Toronto returned soldier and a dentist, a disintegrating surgical plaster, which overcomes the necessity of cutting or sawing plaster casts for removal, was shown in Toronto at the convention of the Ontario Hospital Association. It was discovered by John Aubrey-Charles, returned soldier and practical chemist, and Dr. J. B. Lapp, dentist.

Efforts are being made to establish Cochran as a principal port of India.

**A Law Every  
Mother Should  
Know and Observe**  
Never Give Your Child An  
Unknown Remedy without  
Asking Your Doctor First

According to any doctor you ask, the only safe remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everything where, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know. Made in Canada.

**PHILLIPS' Milk of Magnesia**

**Place Men On Farms**

**Alberta Government Planning To  
Care For Single Unemployed  
Men**

A plan under which from 2,000 to 4,000 single unemployed men would be placed on farms this winter is being considered by the Alberta government, Premier Aberhart stated.

The plan is an extension of the scheme operated during the past two years. While the unemployed men would be given \$5 a month as formerly, a similar sum would also be paid to the farmer.

Another suggestion is that such employment placed on farms under this scheme would not be required to work more than five hours a day. Paving the way for the \$5 monthly cash payment monthly to rural families in need of relief, an order-in-council has been passed by the provincial government.

The plan was outlined recently by Premier Aberhart, who said it was not to be regarded as providing a real "basic dividend." While the minimum amount was set at \$5 which would be provided by the government, the municipality would be expected to match it with \$2.50.

As compensation for its contribution, the municipality could require the relief recipient to give some return in work. If the size of the family justifies more than the minimum, this would be provided, while as the sum increased, the municipality's share would be proportionately increased.

### Applying For A Job

**Girl Stated Qualifications But Neglected To Sign Her Name**

A girl applied yesterday to Walter Lister, city editor of the Post, for a reporter's job—but was disappointed. "Are you prejudiced against women in the newspaper game?" she asked.

"Mr. Lister replied: 'It isn't that we're prejudiced—I find that most of them are careless and sloppy in their work.' ... Send me a letter, with references, your qualifications, and I'll place it on file."

The letter arrived—a two-page note, carefully typewritten, and listing qualifications tending to offend any suggestions of carelessness.

The lady, however, forgot to sign her name—Leonard Lyons, in New York Post.

### Run Into Misfortune

**First Woman To Swim English Channel Has Hard Luck**

Gertrude Ederle, the girl who ten years ago was the first woman to swim the English channel, can now swim only a few feet. Her back injured in a fall, she is fighting to retain the control of her legs. In an edition, misfortune has dogged her in that she has become partially deaf because of all the swimming she has done, and the money she made after her channel swim has been lost on unwise investments.

Canada is larger than the continental United States by approximately 500,000 square miles.

**SUNDAY SCHOOL LESSON**  
NOVEMBER 3  
JUDAH TAKEN CAPTIVE

Golden text: Righteousness exalteth a nation; But sin is a reproach to any people. Proverbs 14:34.

Lesson: II. Kings 24:1 to 25:21; Jeremiah 39:1-18.  
Devotional reading: Psalm 107:10-16.

**Explanations and Comments**  
The Siege of Jerusalem, verses 1-3. In the ninth year of Zedekiah's reign, 586 B.C., in the month month according to the Babylonian calendar (which numbered its months from the spring season, the tenth month corresponding to our January), and on the tenth day of the month, Nebuchadnezzar, king of Babylon, came with his army and besieged Jerusalem.

The nation never forgot the month and the day on which the armies of Chaldeans finally invested the city. It was felt as the day of the broken down, the month of the broken down, the day of the broken down, the month of the broken down, the day of the broken down.

The Fate of Jerusalem, verses 4-7. When a breach was finally made in the city walls, the Israelites fled by night by the way of the gate between the two walls, which was by the Jericho side. This gate was on the south of the city. The Israelites had known that there was little chance of making good their escape, for the Chaldeans surrounded the city.

The Fate of Jerusalem, verses 8-10. On the seventh day of the fifth month, Nebuchadnezzar, the king of Babylon, sent his army to the king's bodyguard to whom such a sacred mission, came to the destruction of Jerusalem.

The Fate of Jerusalem, verses 11-12. The commander of the bodyguard carried off as prisoner the people left in the city and those who had already surrendered to the king of Babylon, as well as the rest of the king's household and the king's household.

The Fate of Jerusalem, verses 13-14. The poorest of the people were left to cultivate the land, as vine-dressers and husbandmen.

**Canadian Premiers**  
Fifteen Ministers Since The Time of Confederation

After all these weeks of discussion of Canadian affairs how many could name the premiers since Confederation, 1867? Sir John A. Macdonald, 1867; Sir John A. Macdonald, 1873; Sir John A. Macdonald, 1878; Sir John A. Macdonald, 1883; Sir John A. Macdonald, 1888; Sir John A. Macdonald, 1893; Sir John A. Macdonald, 1898; Sir John A. Macdonald, 1903; Sir John A. Macdonald, 1908; Sir John A. Macdonald, 1913; Sir John A. Macdonald, 1918; Sir John A. Macdonald, 1923; Sir John A. Macdonald, 1928; Sir John A. Macdonald, 1933; Sir John A. Macdonald, 1938; Sir John A. Macdonald, 1943; Sir John A. Macdonald, 1948; Sir John A. Macdonald, 1953; Sir John A. Macdonald, 1958; Sir John A. Macdonald, 1963; Sir John A. Macdonald, 1968; Sir John A. Macdonald, 1973; Sir John A. Macdonald, 1978; Sir John A. Macdonald, 1983; Sir John A. Macdonald, 1988; Sir John A. Macdonald, 1993; Sir John A. Macdonald, 1998; Sir John A. Macdonald, 2003; Sir John A. Macdonald, 2008; Sir John A. Macdonald, 2013; Sir John A. Macdonald, 2018; Sir John A. Macdonald, 2023; Sir John A. Macdonald, 2028; Sir John A. Macdonald, 2033; Sir John A. Macdonald, 2038; Sir John A. Macdonald, 2043; Sir John A. Macdonald, 2048; Sir John A. Macdonald, 2053; Sir John A. Macdonald, 2058; Sir John A. Macdonald, 2063; Sir John A. Macdonald, 2068; Sir John A. Macdonald, 2073; Sir John A. Macdonald, 2078; Sir John A. Macdonald, 2083; Sir John A. Macdonald, 2088; Sir John A. Macdonald, 2093; Sir John A. Macdonald, 2098; Sir John A. Macdonald, 2103; Sir John A. Macdonald, 2108; Sir John A. Macdonald, 2113; Sir John A. Macdonald, 2118; Sir John A. Macdonald, 2123; Sir John A. Macdonald, 2128; Sir John A. Macdonald, 2133; Sir John A. Macdonald, 2138; Sir John A. Macdonald, 2143; Sir John A. Macdonald, 2148; Sir John A. Macdonald, 2153; Sir John A. Macdonald, 2158; Sir John A. Macdonald, 2163; Sir John A. Macdonald, 2168; Sir John A. Macdonald, 2173; Sir John A. ## SYNOPSIS

Nancy Nelson is a sub-teen, a grey, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. But, early in the market crash, her indulgent father loses his job, and his family is faced with the necessity of a simpler mode of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted. Nancy and Jack arrive at Pine Ridge. They get out their traps and climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road driven by Matt Adams, and she asks him which way to go. They follow him, and he looks around and then goes on to Cousin Columbine's.

Jack Nelson tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonely, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one. Hence Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matt Adams' uncle for a day, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collect with a bus full of school children, which was stalled across the road with its back wheels stuck in a snow-drifted gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for the city to get help. He succeeds in finding help, and the party of children and their parents are rescued. As a result of the exposure Nancy's hair has become frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now to Go With The Story

## CHAPTER XXI—Continued

He blushed a little; and Nancy said: "I told him that Jack is. It took luck to leave even the cold shelter of that bus, you know. But to make a fuss over me is—just ridiculous! I'd have been a coward to watch those kiddies freeze to death and not do everything I could. You know I would!"

"There was silence a moment before Matt asked: 'Do you remember the last time we sat under the old pine, Nancy?' You told me then that that coward had never been tested and you wondered how you'd show up in a pinch. Well, you know now, don't you?"

4 to 5

TIMES

MORE QUICKLY DIGESTED THAN COD LIVER OIL

Science has discovered why Scott's Emulsion of Pure Cod Liver Oil is so much more beneficial than plain cod liver oil. All plain oils are difficult to digest, and they are emulsified in the stomach. We emulsify the oil in our laboratories here it is ready for almost immediate digestion and assimilation.

SCOTT'S EMULSION

THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES

For sale by YOUR DRUGGIST

Though the family at Edgemore was disappointed, this plan was obviously best for Jack, and they did not protest. The boy's strength returned more rapidly than Cousin Columbine anticipated; and by the middle of May they ventured to make some of the long-promised excursions to places not far distant enough to tire him.

"I'm sick to death of putting up picnic mornings," grumbled Aurora one bright May morning. "And why anybody in their senses should go to Cripple Creek when they could stay away, is something entirely beyond me. Not a tree in the whole town, Nancy Nelson! Not a grove! This lesson you count sage; and those awful prospect holes all over the hills look like all the world like open graves in a cemetery. And here's Miss Columbine as excited over the trip as if she'd never seen a minor town, let alone lived in one of the rocky places for months on end! Jack, you're to forget every drop of milk in this thermos bottle, and if you feel able to wrest 'em, three bananas. They're powerful fattenin', as I ought to know if anybody does. Is it true you've taken a whole roast chicken? I hope for your sakes her husband had the cookin' of it. Looks like the Adams is neglectin' everything three days take you galle-van'tin'. It's a wonder they stop to milk the cows."

They were then laughed when Nancy repeated this caustic comment. "But who cares, my dear? We'll make up the neglected work after you leave us and it won't be long before we see how Miss Columbine enjoys these trips. It gives her a new lease to life to visit the old scenes and take those times with young folks who are really interested."

Jack thrilled over that trip to Cripple Creek; and the day after the scene of Farmer Peterson's colossal howl, stood out, a high light, in Nancy's memory. This was during the first week in June, a day with soft, white clouds drifting across the sky, and air like mid-summer. Their road was just past the first bend where they were ploughing immense acres; there on through mile after mile of yellow plains. Seated between Mark and Matthew, Jack took the truck (the comfort of the new 'rdan being given over to the older Adams, Cousin Columbine, and Mary Taylor, seated on the cushions in the rear), were jabbering away as if there were no "wonders to be seen." They talked of the "Love's young dream, lady," Mark opined as he slowed down for this scene. "You planned to stay to dinner, Matt Adams," called Aurora shrilly. "If so, and you're willing to carry up three trays, try and Miss Columbine can eat with young folks. What say?"

## CHAPTER XXII

"I am well aware, dear Cousin James," wrote Columbine Nelson on the first day of May, "how anxious you are to get your heroic young folks back; but nevertheless, I am going to ask a favor: Let them stay away has time to fill out again. He looked so splendid the morning they started off for Prairie Ranch that I can't bear to send him home to you as quaint as he is now. A few weeks of careful feeding will work wonders in his appearance; and 'Disillusioned' is a thing to be kept up," as she expresses it. If I may keep them until after the fourth of July they'll have a chance to see some of this of this wonderful country; and your old cousin will be fair happier."

A note from Nancy added her plea: "Don't ever think that we're not crazy to see you all, but Jack is a beanpole, and Aurora's marvellous pale to become. I don't object to because she paid our fare out here. Aurora told me that. I guess Uncle Jethro didn't make any great pile in Leadville; and I don't accept a penny of the 'salary' she offered as bait in that comical letter. My handering gift will return as poor as she started out."

"But I'm feeling wonderful now. My feet are as good as new. The boys' booming and I will get something of a kick when my one address me as 'Miss Aladdin.' I've not gone back on New England, today; but I'll miss the library and those 'big, open spaces' we Easterners joke about. Tell Phil I'm sending a 'him some real Indian arrow heads.'"

"I don't ever think that we're not crazy to see you all, but Jack is a beanpole, and Aurora's marvellous pale to become. I don't object to because she paid our fare out here. Aurora told me that. I guess Uncle Jethro didn't make any great pile in Leadville; and I don't accept a penny of the 'salary' she offered as bait in that comical letter. My handering gift will return as poor as she started out."

## Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly in your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach, often, for the heart. Which is food to think of if you seek quick, safe relief.

Scientists rate "Aspirin" among the safest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of Bayer Pharmaceutical Limited, Ltd. For the name Bayer in the form of a cross on every tablet.

Demand and Get

"ASPIRIN"

His voice was thoughtful, and with sudden inspiration the girl quoted:

"Under the wide and starry sky Dig my grave and let me lie."

"Is that how you feel, Matt?"

His eyes lighted at her intuition; but before he could reply, Mark's laughing voice broke in upon them.

"Both poetic and appropriate, young lady; but you two seem to have forgotten that we're on our way. The old folks have caught up with us, but they're too lazy to get out, and Jack's already appearing in melancholy scene. There's still ten or twelve miles ahead if we're to eat our lunch on the shore of the Platte, as Miss Columbine has set her heart on doing. Have some cake?"

Matthew, who longed to strangle his brother for this intrusion, nevertheless accepted his portion with good grace; while Nancy exclaimed: "You've saved my life, Mark! I'm almost passing out. Isn't the Platte river we read about in history—I mean the one the pioneers were always fondling?"

Mark chuckled, and rounding a curve, announced: "Here's your pioneer cemetery. Nancy—the one Miss Columbine told about. Shall we view it from here, or are you determined to climb that slope in this hot sun?"

"What did we come for?" the girl responded; and as Matt sprang down as she took the steady hand of the "sweet" on Mary; and that always has certainly blossomed out just lately.

"I believe, of association with Miss Aladdin."

Nancy laughed; and with due respect to Miss Aladdin, I've a notion that our kid brother is responsible for that change in Mary Taylor. He turned to view the ubiquitous couple resting on a bench, and said: "At that rate, they're both oblivious to the scenery."

## Rise in Diamond Prices

Increase To Release More Stones For The World Market

London's diamond kings, controllers of the world's supply, are to release for sale more uncut stones within a short time than were sold throughout the whole of last year.

So convinced are they in England that the world has recovered enough to indulge once more in luxuries that prices are being advanced 7½ per cent, and there is confidence that all stones offered will be sold.

Altogether stones worth more than \$15,000,000 will be offered to selected buyers from all parts of the world within two months. The Diamond Corporation, which has accumulated \$45,000,000 worth of stones during the years of depression, has been allocated a quota in the sales.

Investations already have been dispatched to representative brokers in Amsterdam, Antwerp, Vienna, Paris, Bombay and New York.

The central selling agency of the diamond groups is in a four-story building off Holborn. Every foreign buyer is shown into a walnut-paneled room. He is accompanied by a representative of the sellers. On a square of plain white paper on a ledge under the window is poured a little heap of graded, uncut stones. It represents a fortune.

The buyer examines the stones, makes his choice, pays his price and departs with a tiny package as casually as if he had purchased a bag of nuts.

Biggest buyers are expected to be New York and India. U.S. Jewellers' stocks are believed to be lowest since the depression. India's demand is based on "dehoarding" of gold by the princes.

## Little Helps For This Week

Love is of God, and every one that loveth is born of God and knoweth God. I John 4:7.

Forbearing one another and forgiving one another. Colossians 3:13.

Oh, might we all our lineage prove, Give and forgive, do good and love.

By soft endearments, in kind words, Lightening the daily load of life.

We may if we choose make the worst of one another. Every one has faults, every one has his weak points, and we may fix our attention constantly on these. But we may also make the best of one another. We may forgive even as we hope to be forgiven. We may put ourselves in the place of others and ask ourselves if we would wish to be done to us as they were in their place. By loving whatever is lovable in those around us, love will flow back from them to us and life will be a pleasure indeed instead of a pain. Earth will become like heaven and we shall not be unworthy followers of Him whose name is Love.

16-20	19
12-12	22
10-20	22

Each parcel will be offered for sale subject to reserve bid, and subject to the reservations contained in the existing certificates of title. Terms, cash. Redemption may be effected by payment of the full amount of arrears of taxes and costs at any time prior to the sale.

Dated at Carbon, Alberta, this 13th day of September, 1935.

ALEX. REID,  
Secretary-Treasurer

A bad car smash-up occurred on Wednesday night on the Diels hill to the south of town, when one driven by Gottlieb E. Schell of Carbon, and W. Elliott of Irticoma came head on.

Miss Tilley Dertoch returned on Wednesday from Hanna, where she has spent the past couple of months visiting with Mr. and Mrs. Neubauer. FOR SALE—Number of Chickens. Also, Dining room suite.—Mrs. S. G. Garrett, Carbon.

### Snicklefritz

### SNICKLEFRITZ—

..Murphy, a now cavalry recruit, was given one of the worst horses in the troop.

"Remember," said the instructor, "no one is allowed to dismount without orders."

The horse bucked and Murphy went over his head.

"Murphy," yelled the instructor, "did you have orders to dismount?"

"I did."

"From headquarters."

"No; from headquarters."

They were walking along the beach in the moonlight.

"Does the moon affect the tide?" the sweet young thing asked.

"No, just the untold," he replied.

..

The tired-looking man sat facing the solicitor. "So you want a divorce from your wife?" said the latter. "Aren't your relations pleasant?"

"Mine are," came the answer, "but hers are simply terrible."

..

"Dear Editor," writes a sweet young thing to "Science and Invention."

"Would you please, without being too technical, tell me how bees dispose of their honey?"

Editor: "Certainly, with pleasure. They sell it."

Teacher—Now if I subtract 25 from 37, what's the difference?

Little Willie—That's what I say, who cares?

..

"What terrible crime has this man committed?"

"He has done nothing. He was merely innocent bystander when Tom's Jim tried to kill a man, and we are holding him as a witness."

"And where's Tom Jim?"

"He's out on bail."

..

Frank: Are they very strict at your college?

Frank: Huh! Are they? Why, when a man dies in a lecture there, they prop him up until the end of the lecture.

I have recently taken over the JOHN DEERE AGENCY and solicit your business. Full line of repairs carried in stock at all times.
